SERVICE OVERVIEW

أشعة صدر رقمية (Chest X-Ray)

Request Type	Guest
Service Type	Radiology
Category	اشعة
Scheduled	-

تصوير أشعة للصدر لتقييم الرئتين والقلب والحالات التنفسية الشائعة.

PATIENT INFORMATION

Mohammed Aldomi

Phone	0779667168
Gender	-
Age	-
Date of Birth	-

Al-Madinah Al-Riyadiyah

Mohammed Aldomi

Doctor uploaded a diagnostic document that is appended after this report.

REPORT CERTIFICATION

Approved by **System Admin** - Reviewed 22/03/2026, 22:56:19 - Generated 22/03/2026, 23:12:33

This report was issued by Curevie for home healthcare services. Ref: 664AA81B

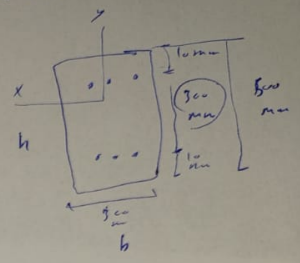
Task # 3

Problem # 1

Design the steel reinforcement for the uniaxial eccentrically loaded short column shown below, using the appropriate interaction diagram.

- use $f_c' = 28$ MPa, and $f_y = 420$ MPa.

Knowing that: $e_x = 150$ mm, and $P_n = 2200$ kN



$$\gamma = \frac{\gamma h}{h} = \frac{300}{500} = 0.6$$

$$K_n = \frac{P_n}{f_c' A_g} = \frac{2200 \times 10^3}{28 \times 300 \times 500} = 0.524$$

$$R_n = \frac{P_n \cdot e}{f_c' A_g h} = \frac{2200 \times 10^3 \times 150}{28 \times 300 \times 500 \times 500} = 0.16$$

$\rho = 0.018$ حسب الجدول

$$A_s = \rho A_g = \rho b h = 0.018 \times (300)(500) = 2700 \text{ mm}^2$$

Design for $6 \phi 25$

A_s provided $= 2945$ mm^2 $> A_s$ (o.k)
